Aims & Objectives

ECRIN (European Clinical Research Infrastructures Network) is a public non-profit organization whose main objective is to support and facilitate multinational clinical trials, providing researchers belonging to affiliated countries, members and observers, a variety of useful services for the clinic research. Italy, as a member of ECRIN, takes advantage of its National clinical trial unit network, ItaCRIN, to promote a high-level non-profit clinical research focused on the identification of innovative therapeutic strategies to the benefit of public health.

In this context, the main purpose of this event is to introduce ECRIN and its activities with the aim to support and facilitate the management of multinational clinical studies, providing researchers, belonging to ECRIN members and observers countries, a variety of useful services for the experimentation.

Speakers

Silvio Brusaferrò

Istituto Superiore di Sanità, Rome
